# 02 Securos veterinary premium sutures

We offer quality you can trust and service that always delivers. Industry-leading tensile strength. A sampling program that lets you experience our sutures first-hand. An unmatched, 100% money-back satisfaction guarantee. All priced at an average of 34% less than other industry leaders.

## **Made with your practice in mind**

Unlike many leading sutures on the animal health market that are produced for human use, our sutures are tailor-made for your practice. We make diverse lines that address veterinary concerns, while complying with human quality standards in an FDA-registered and audited production facility that meets or exceeds USP specifications.

## **More suture, less memory**

Our standard 12-count packaging helps keep your inventory low and storage efficient, reducing waste. Our most popular lines are made three inches longer than other industry leaders, sparing you the frustration of having to open another pack to throw just one more knot. We offer dental sutures in more mouth-friendly 18-inch lengths. And our racetrack card packaging reduces suture memory, optimizing handling on all our lines.

## **Orthopedics**

Developed from the insights of practicing veterinary surgeons

## **Instruments**

Performance you can feel the moment each instrument reaches your hand

## **Sutures**

Premium quality at price points that drive your success

**Delight, guaranteed.**

Choosing your suture line is a personal decision. You want to try it, feel it, and see the results. That's why we offer a sampling program that lets you experience the quality of our line, without committing to a full order. Visit [securos.com](https://www.securos.com) for more information.

We're so confident you'll love working with our product, we back every box with a 100% money-back satisfaction guarantee.

## Regulatory Compliance

### How do we build a great suture?

Quality systems at partnered manufacturer in USA.

### ISO 13485 (2016):

#### Medical Devices - Quality Management Systems

- CFR Title 21 Part 820 • 93/42/EEC: Medical Device Directive
- SOR/98 • RDC 16/2013 • United States Pharmacopeia
- 70+ Countries • FDA Registered • 510k(s) • CE Mark (Pending)

## Inspection. How do we know?

### Process Verification

- 100% in-process needle attachment

### Sterilization Release

- Parametric
- Biological

### Release Testing per United States Pharmacopeia (USP) Specifications

- (5 pcs) Needle attachment sutures-needles <871>
- (10 pcs) Tensile strength tensile strength <881>
- (10 pcs) Diameter/length testing suture-diameter <861>
- Visual inspection
- Pouch seal verification >1.3lbf

### Process Trending

- Weekly QA
- Users
- Feedback
- Clinical

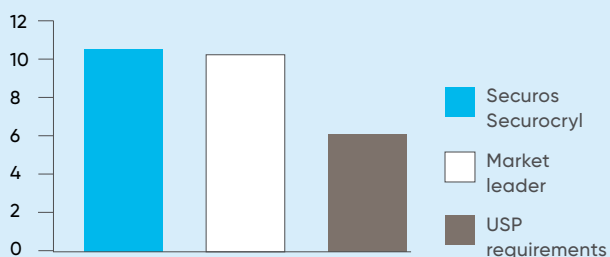

# Quality matters

That's why every single one of our suture options is made in the United States with premium materials, industry-leading tensile strength, and needles that require 12-20% less force to push through tissue than comparable products on the market. We only make premium products, but don't charge premium prices. We support your hospital's financial health, and the health of your patients, without sacrificing quality or performance.

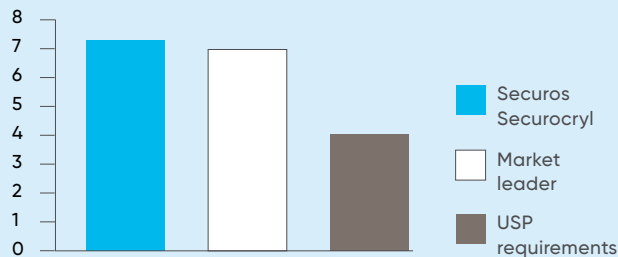

## Suture performance

### How do we compare?

USP <881> is the industry standard for testing tensile strength of surgical suture. The Securos brand PGCL, Securocryl, out performs USP requirements and the market leader brand.

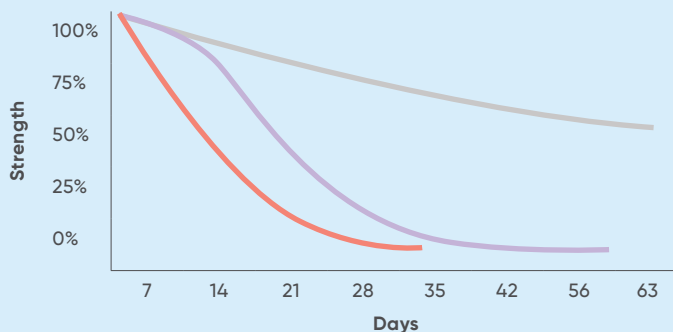

USP <881> Knot-pull tensile 2/0 PGL suture

USP <881> Knot-pull tensile 3/0 PGCL suture

## Tensile strength comparison chart

Suture type	Complete absorption
SECUROSORB™	60-90 days
SECURODOX™	180-240 days
SECUROCRYL™	80-120 days

## Absorbable suture

### SECUROCRYL™

Monofilament, Poliglecaprone 25 (PGCL), synthetic absorbable suture

**Violet or undyed**      **Shelf-life: 4 years**

### SECURODOX™

Monofilament, Polydioxanone (PDO), synthetic absorbable suture

**Violet**      **Shelf-life: 5 years**

### SECUROSORB™

Coated, braided, Polyglactin 910 (PGLA), synthetic absorbable suture

**Violet or undyed**      **Shelf-life: 5 years**

### CHROMIC GUT

Chromic treated, natural absorbable suture

**Beige**      **Shelf-life: 5 years**

### SECUROSORB™ QUICK

Fast-absorbing, coated, braided, Polyglycolic Acid (PGA), synthetic absorbable suture

**Undyed**      **Shelf-life: 5 years**

## Antibacterial absorbable suture

### SECUROSORB™ PLUS

**Antibacterial** coated, braided, Polyglactin 910 (PGLA), synthetic absorbable suture

**Violet or undyed**      **Shelf-life: 3 years**

### SECURODOX™ PLUS

**Antibacterial** monofilament, Polydioxanone (PDO), synthetic absorbable suture

**Violet**      **Shelf-life: 3 years**

### SECUROCRYL™ PLUS

**Antibacterial** Monofilament, Poliglecaprone 25 (PGCL), synthetic absorbable suture

**Violet**      **Shelf-life: 3 years**

# Packaging design features and benefits

Color identification

Pouch pull slot

## Elegant suture box

- Color coded for easy identification
- Easy open box over-wrap pull tab offers swift and painless opening
- One-dozen size is optimal for inventory management

Protective foil pouch

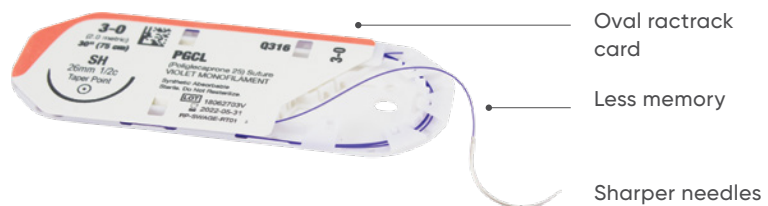

Easy peel design

## Convenient suture peel pouch

- Quality every time. Foil pouch offers complete moisture and UV barrier
- Easy to open Securos peel design
- Single foil pouch unit. Reduces waste and steps to get product onto sterile field

## Premium suture racetrack

- High performance racetrack card significantly reduces suture memory
- Optimal handling. Racetrack alleviates the hassle involved with tugging and straightening the suture
- Needle quality. Premium needle tip protected in package by foam

Oval racetrack card

Less memory

Sharper needles

Leading brand

## Packaging comparison

# Securos 300™ premium suture needles

Our needles are made from a propriety steel blend which is mechanically processed to make the material harder while still retaining high tensile strength

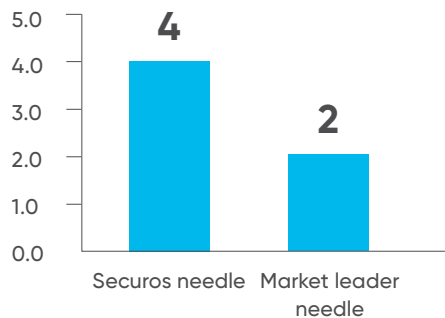

This enables the needles to have very sharp points and great durability while maintaining their flexibility. The same steel blend in our needles is used in the demanding human cardiac and plastic surgery areas where it has displaced more conventional needles

## Needle sharpness and strength

Our needles are made from 300 series stainless steel, which has greater tensile strength, higher ductility and less brittleness than 400 series stainless steel

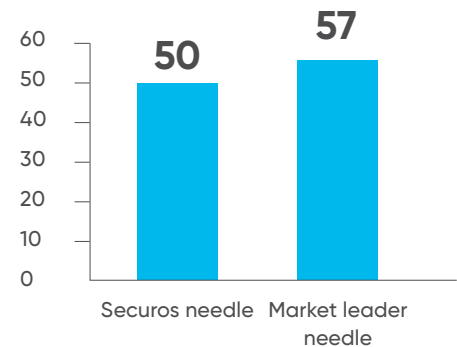

## Ductility

100% increase in ductility.  
Less likely to break when reshaping.

 Cycles to fracture

## Sharpness

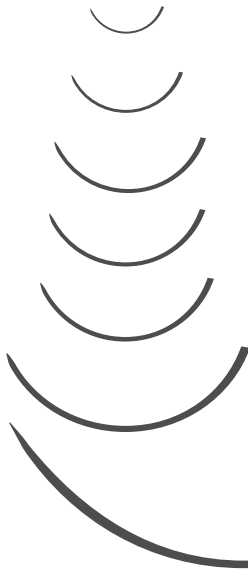

12% less force needed.  
Less force, less tissue trauma.

 Penetration force (gf)

## Cobra Black<sup>®</sup> needles

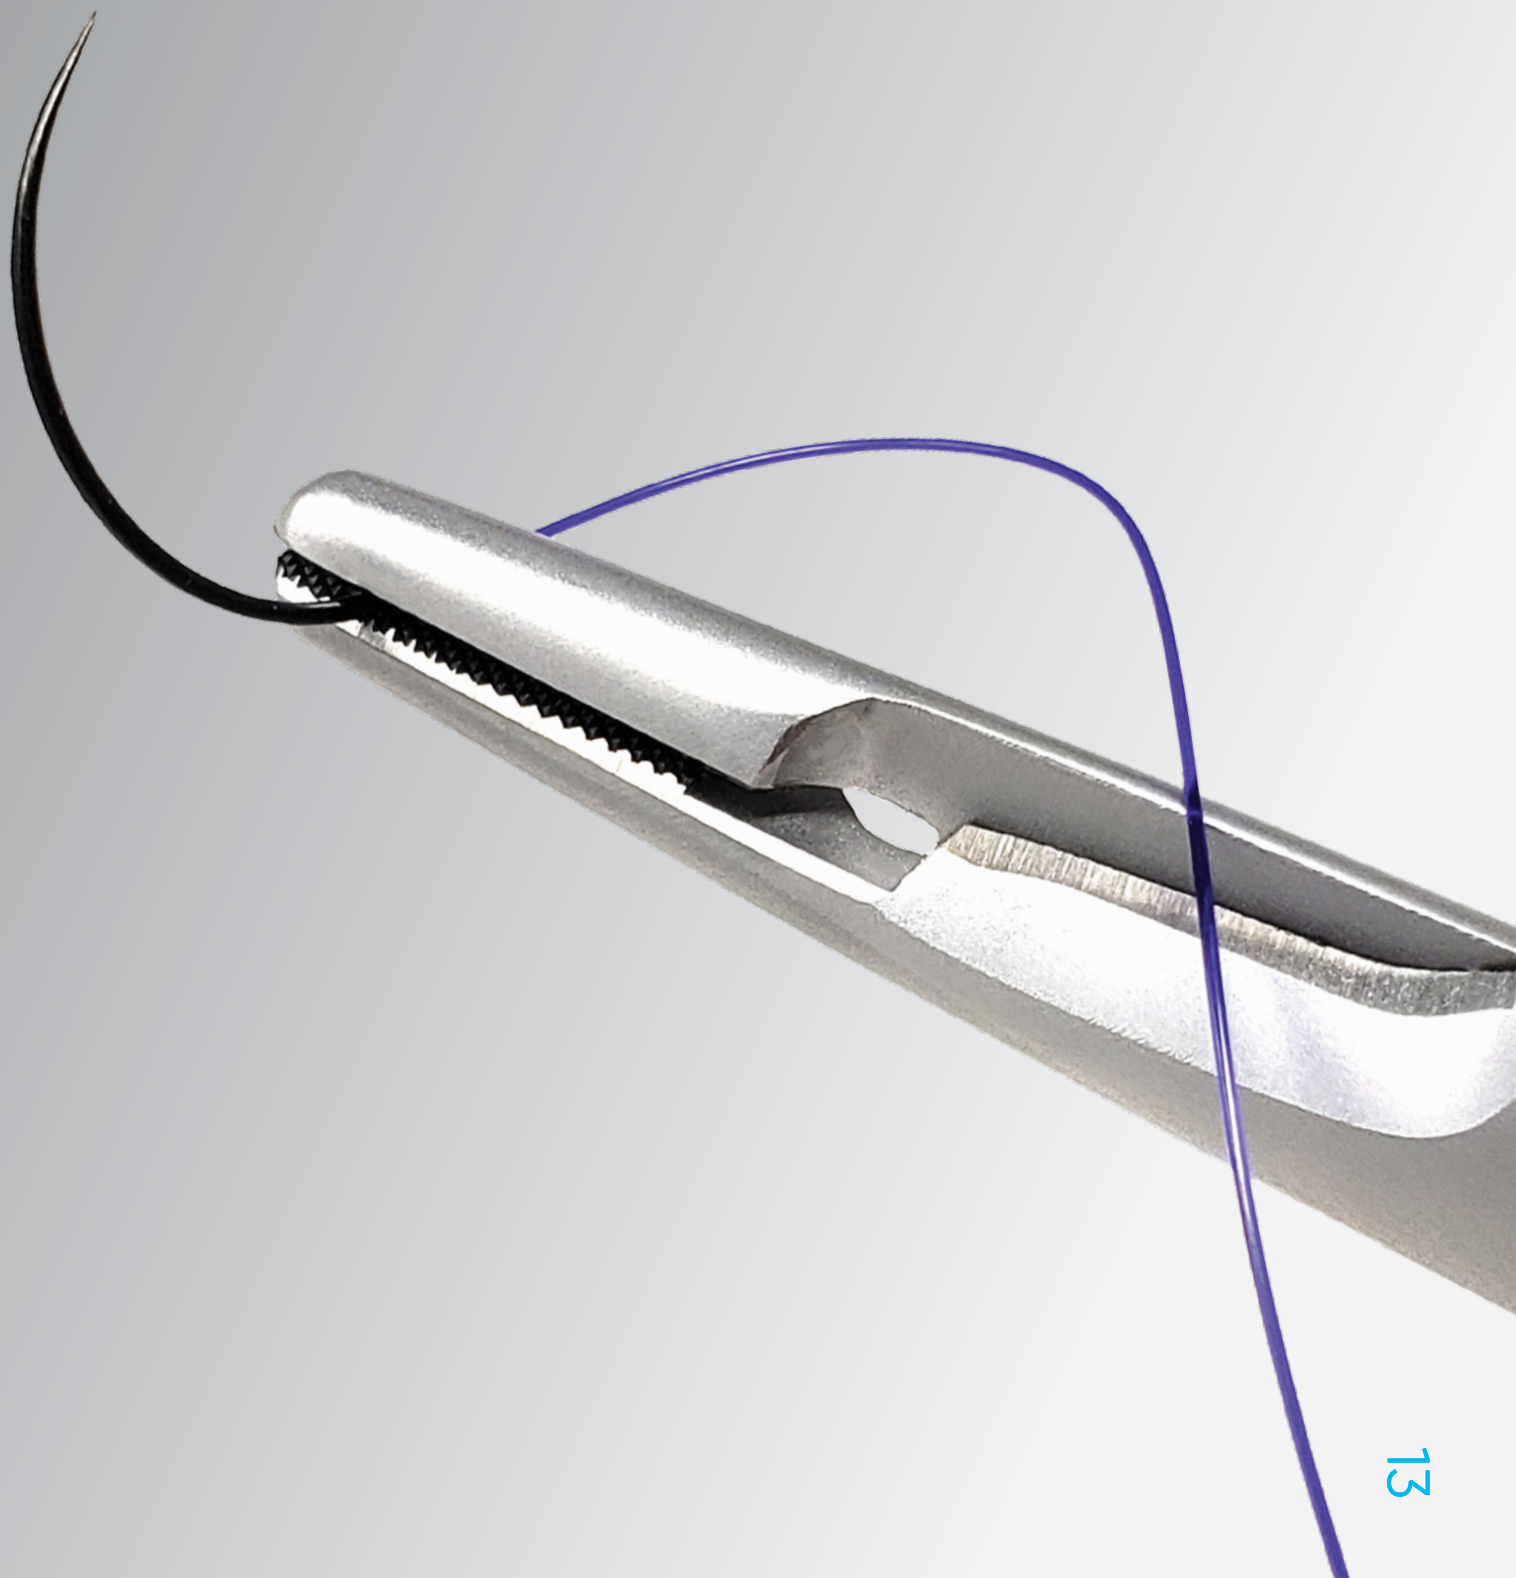

The Cobra Black needle are designed to enhance visibility especially in blood and smaller surgery sites. The black color reduces eye strain by eliminating the glare from the operating room lights. The sharp edge of Securos needles are a proprietary steel blend that offers a cutting edge that requires less penetration force than alternatives, resulting in less tissue trauma.

## Premium dental suture

Securos offers a complete dental suture offering designed to minimize the veterinarian's frustration with oral surgery. Our fast absorbing suture, Securosorb Quick, partnered with the improved visibility of our Cobra Black needles provides the ideal suture for veterinary oral surgery. These dental specific suture strands are cut short at 18" for better handling in tight spaces. Securocyl is also commonly used in oral surgery and select sizes are available in 18" strands with Cobra Black needles.

Veterinary use only

### SECUIROSORB™ PLUS

Antibacterial coated, braided, Polyglactin 910 (PGLA), synthetic absorbable suture

Violet or undyed Shelf-life: 3 years

### SECUIRODOX™ PLUS

Antibacterial monofilament, Polydioxanone (PDO), synthetic absorbable suture

Violet Shelf-life: 3 years

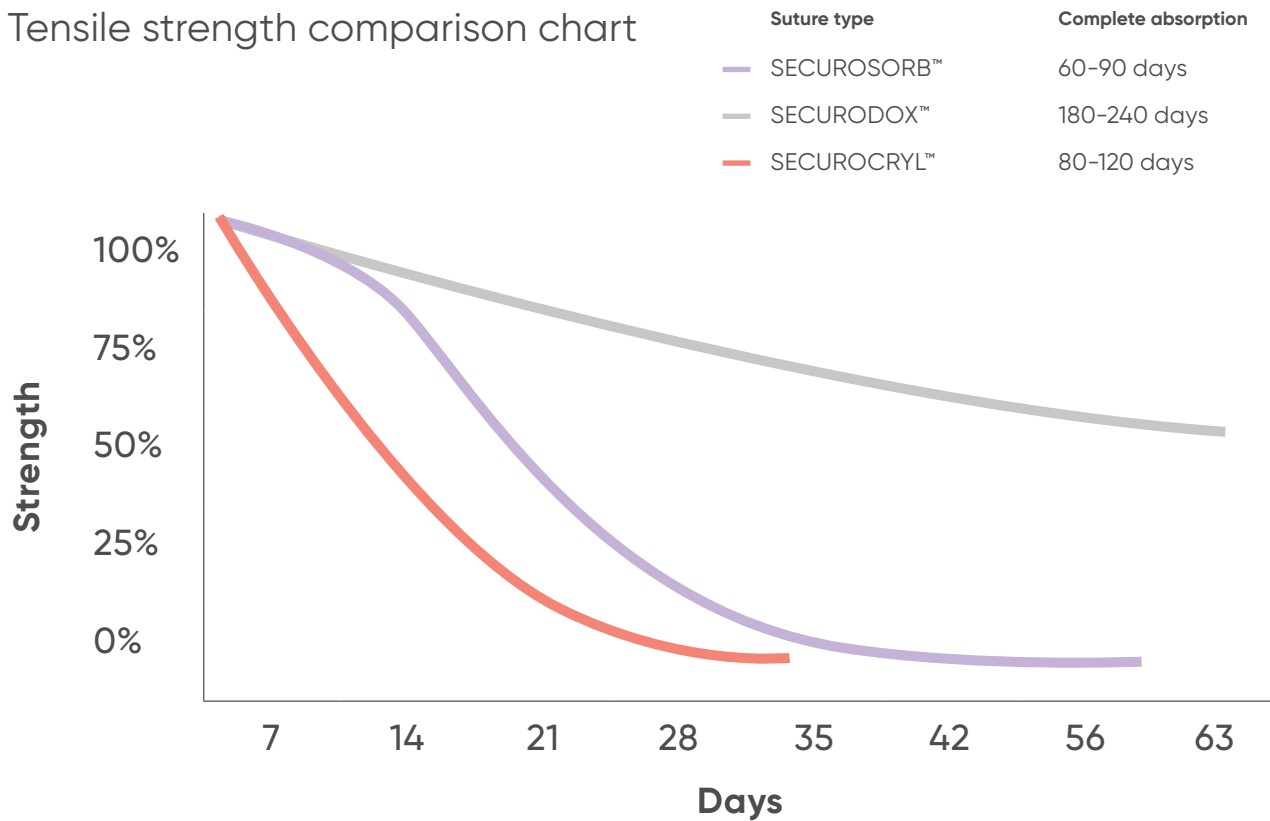

### SECUIROCRYL™ PLUS

Antibacterial Monofilament, Poliglecarpone 25 (PGCL), synthetic absorbable suture

Violet or undyed Shelf-life: 3 years

Tensile strength comparison chart

# PLUS surgical suture products

**A great alternative for high-risk patients or procedures where bacteria is a concern**

- Securos PLUS sutures provide the same handling and performance as our other suture products, but with the added benefit of antibacterial protection
- Securos PLUS sutures are coated with chlorhexidine diacetate, a proven antibacterial agent, that result in a zone of inhibition around the suture line
- Our PLUS antibacterial agent is recognized as being effective against bacteria such as Staphylococcus aureus, Staphylococcus epidermidis, MRSA and MRSE

## Zone of inhibition

**PLUS suture product with Antibacterial coating**

\*

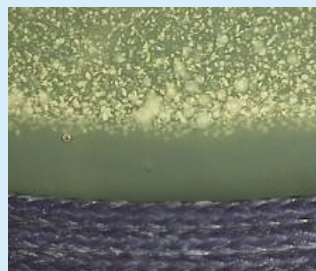

**Suture product without Antibacterial coating**
